

## Item 556      Cleaning Swabs / Foam Buds filled with Isopropanol in the plastic stick

Properties	Cleaning swabs filled with Isopropanol
Area of use	For all machines and devices in the electronic and technical field. For optimal cleaning of print heads in thermal printers and plastic card printers.
Characteristics	Efficiently cleans gaps and hard-to-reach areas. Cleans gently and leaves no residues.
Benefits	The cleaning sticks already contain the isopropanol in the style. By bending the tip, the IPA can escape and be applied via the foam head.
Advantages	Less printer damages and fewer device failures thanks to preventive cleaning. Good cleaning effect. Simple and user-friendly handling. We recommend cleaning before every change of paper.
Technical details	IPA-impregnated Swabs. 25pcs in a practical bag
Item number	556.025: 25pcs
